

Departmental Students' Seminar, 2026

On 13th February 2026, the Department of Economics at St. Paul's Cathedral Mission College organized a students seminar on the topic "Power BI and Power Query". Papers were presented by the Semester 3 Major students and the event took place in Room No CB4 from 12:00 noon and was attended by all students and faculty members of the department.

The session aimed to introduce participants to modern data analysis and visualization tools, focusing on the practical applications of Power BI and Power Query in economics and research. The presenters of Semester 3 were divided into four groups and they began with an overview of data analytics and its growing importance in the field of economics. They then explained the functionalities of Power Query, demonstrating how it can be used for data cleaning, transformation, and preparation.

Following this, the students showcased Power BI, highlighting its capabilities in creating interactive dashboards and visual reports. Through live demonstrations and examples, they illustrated how complex datasets can be simplified into meaningful insights using charts, graphs, and other visualization tools. The presentation also included case studies relevant to economic data analysis, which made the session more engaging and informative.

The faculty members appreciated the effort and clarity of the presenters, emphasizing the relevance of such technical skills in academic and professional settings. The interactive nature of the session encouraged questions and discussions, making it a fruitful learning experience for everyone present.

The event concluded successfully, enhancing students' understanding of data visualization tools and their applications in economics. Overall, the presentation was insightful, well-organized, and highly beneficial for the department.

Few pictures of the event are shown below.
